

- [16] W. Qian, L. Lina, X. Bei, and C. Houhe, "Planning of distributed energy storage system for improving low voltage and network loss in rural network," *Journal of Northeast Electric Power University*, vol. 37, no. 5, pp. 19-24, 2017.

Liquan Zhao <https://orcid.org/0000-0002-9499-1911>

He is an assistant professor at Northeast Electric Power University, China. He received his Ph.D. degree in college of information and communication from Harbin Engineering University in 2009. His current research interests include wireless sensor networks and blind source separation.

Meijiao Gai <https://orcid.org/0000-0002-9143-1863>

She received her Bachelor's degree at Baicheng Normal University in 2012. She is now a M.S. student in college of information engineering at Northeast Electric Power University, Jilin. She is interest in the recognition of multiple power quality disturbance.
